Member of NHS Research. And have had lots of my creative writing published in 'United Press Ltd', 'Xlibris Publishers' and quite regularly, an average 2 poems a month, in 'The Blackpool Gazette' local Newspaper.

### **An Important Message**

The thing that is getting everyone world-wide worse health-wise day after day, especially, though not only, people with psychological/behaviour mental problems, is the unexplicit/unnatural title 'Doctor' being used.

With a reference to a 'Health Consultant' people will think naturally about going to see them for a 'consultation about their health'.

With a reference to a 'Treatment Consultant' people will think naturally about going to see them for 'some treatment and a consultation about their health'.

Where-as with reference to a 'Doctor' people can see this as naturally saying what? Or is it an Unexplicit/Unnatural confusing title.

Speaking to someone with an Unexplicit/Unnatural title, such as 'Doctor', about health difficulties brings the problems more to the front of the sufferer's mind, causing more thought, therefore more trouble of it.

For the sake of everyone worldwide getting much Healthier and Happier the Unexplicit/Unnatural word 'Doctor' urgently needs changing to a much more Explicit/Natural one like 'Health Consultant'.

To have details and access to, and with deep appreciation sign, a certain very important petition me and some friends are doing at the moment, which with good support could lead to everyone worldwide getting much Healthier and Happier, please look at the article towards the base of website index [www.poetryemotion.org.uk](http://www.poetryemotion.org.uk)

If you'd like a look at lots of my other better than average Psychological intelligence, please feel free to via the website index shown above look at the 'emotion' section – some-times needing to press 'Click Here' for access.
