Get Out is a movie I selected to teach my students in Counseling Diverse Populations about subtle acts of racism here in the United States of America. This movie displays the effects of trauma racism on a person. Being that racism can take the form of both overt and covert nature, it would be extremely important when watching this movie to ensure your students are familiar with such terms as stereotypes, discrimination, prejudice, microaggressions, overt and covert racism, racial battle fatigue, and post-traumatic stress. This would allow them to pick up on various racial incidents which perhaps would not be obvious to many people.

Get Out is one of those movies you cannot just watch once and say I got what the director is doing. You will need to watch this movie a few times and process it with some close colleagues in order to grasp the full understanding of the movie. Mr. John Peele, the director of this movie, did an extraordinary job of conveying the impact of racism from many angles that would leave your head spinning.

I was so smitten by the depth and breadth of this movie in the summer of 2018. I had my class to answer a survey about how they felt the movie added value to their learning in the Counseling Diverse Populations class. The survey consisted of a total of seven (7) questions. Three of them were Likert scale questions with answers ranging from 1 (strongly disagree) to 4 (strongly agree). The seventh question was an open-ended question where students could provide any additional suggestion or comments for improving the use of movies in the course. The students did not have to provide their names. There anonymity was ensured. I had a total of 10 students in the class. All 10 students participated in the survey.

Below are the results of the survey:

- 9 out of 10 students reported they strongly agreed with the use of a movie as a teaching technique for class because it was enjoyable. Only 1 student reported they disagreed.
- 9 out of 10 students stated they strongly agreed they would recommend the use of movies for future use in this course. Only 1 student reported they disagreed.
- 9 out of 10 students said they strongly agreed they were overall satisfied with the course. Only 1 student reported they disagreed.

5 out of 10 students recorded comments to the question- Please provide any additional suggestions or comments you have for improving the use of movies in this course.

Below are the comments verbatim in their own words:

- Enjoyed the Get Out assignment. This has been one of my favorites.
- Great course! Really enjoyed the content and getting to research various cultures.
- Great course! I really learned a lot and enjoyed the experience.
- Continue doing presentations on movies.

Overall, the summer 2018 Counseling Diverse Populations class was pleased with the movie Get Out. They felt this was an excellent project and basically, all the students with the exception of one, recommended to continue using the movie in the future. Being able to survey your students to get an idea of what they think about the techniques you use, allow you to gain insight into what you might need to change or keep when you are using movies in your classes as a teaching tool. I strongly recommend when possible to take a short survey of your students.

Below is the curriculum guide. Hope you enjoy it.

This study guide is designed to allow you to think strategically about the impact of racism in America and how the trauma of racism impact blacks. This film was directed by Mr. Jordan Peel. Chris (Daniel Kaluuya), a black man, is dating Rose (Allison Williams) and she has
decided to take him home to meet her parents for the weekend. As the weekend progresses, there are a series of events that take place and Chris begins to realize this is not an ordinary weekend getaway.

Please as you view this movie, view in the eyes of counselors, paying close attention to the social psychological impacts that race has in the movie.
